

List of tables

Table 3.1. Principal phases of OPC [Taylor, 1997].	13
Table 3.2. Temperature ranges to be considered when characterizing C_3S by TGA.	30
Table 3.3. Sources of transition elements (minor and trace heavy metals) in cement manufacturing [Bhatty, 1995].	31
Table 3.4. Vanadium contents in several residues from oil use [Ye, 2006].	34
Table 4.1. Materials used for several grinding and polishing stages.	45
Table 4.2. Planning for studying vanadium retention on CSH, portlandite and CaO.	46
Table 5.1. Outline of hydrated C_3S samples characterised by TGA.	54
Table 5.2. Portlandite amounts obtained in CSH characterisation.	54
Table 5.3. Portlandite amounts obtained in the CSH characterisation and amounts obtained in previous works.	56
Table 5.4. Total amount of portlandite obtained in the commercial CH characterisation.	59
Table 5.5. Total amount of portlandite obtained in the <i>insitu</i> CH (of different hydration times) characterisation.	60
Table 5.6. Total portlandite amounts comparison (averages) between commercial and <i>insitu</i> CH.	61
Table 5.7. Total amount of portlandite obtained for hydrated CaO with V solution (at different times) characterisation.	64
