ENCAVALLADA TIPUS T-3

Accions (Combinada - 1)

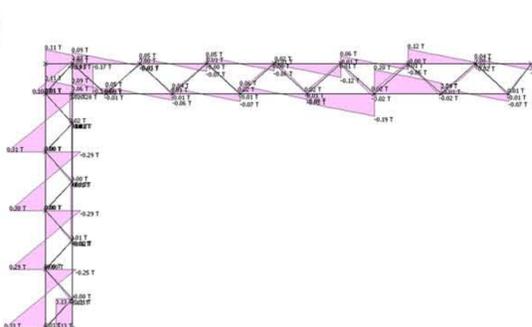

Deformacions (Combinada - 1)

Reaccions (Combinada - 1)

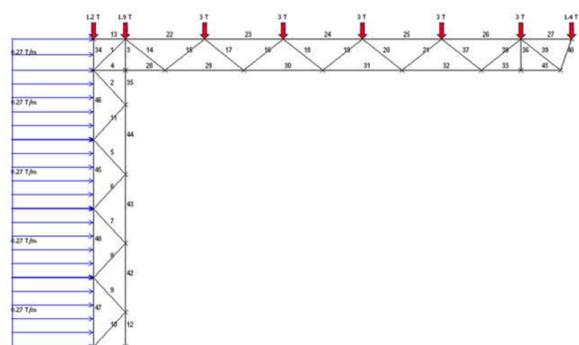

Axials (Combinada - 1)

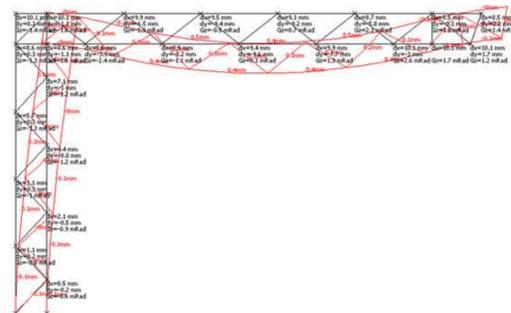

Tallants (Combinada - 1)

(Vermell -> Tracció ; Gris -> Compensió ; Verd -> Variable)

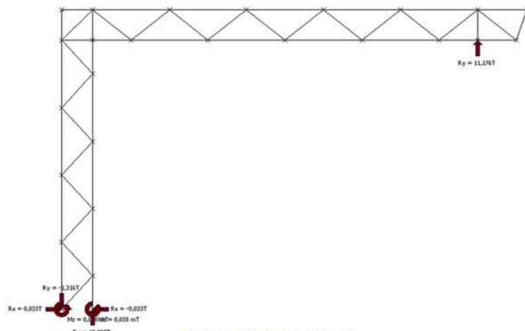

ENCAVALLADA TIPUS T-1

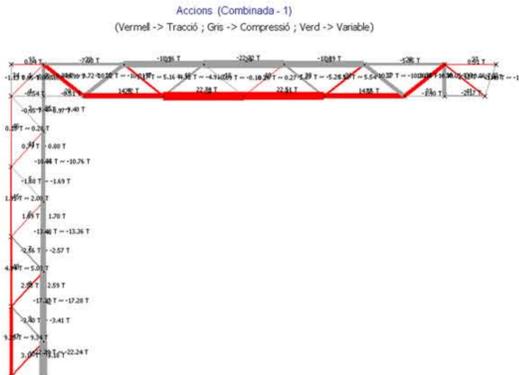

Accions (Combinada - 1)
(Vermell -> Tracció ; Gris -> Compensió ; Verd -> Variable)

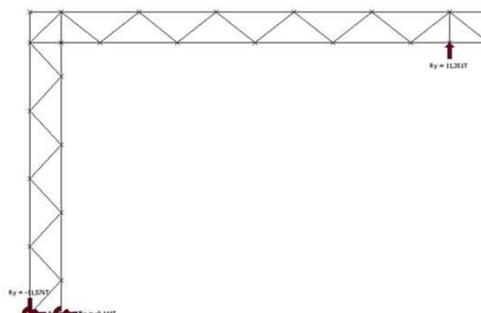

Deformacions (Combinada - 1)

Reaccions (Hipòtesi - 1 + Pes propi)

Axials (Combinada - 1)

Reaccions (Combinada - 1)

ENCAVALLADA TIPUS 3
f/vent voladú = 500/1,42 = L/350
f/hor = 900/0,6 = L/1500

$\lambda = L_0/i_x = 250/0,35 = 714,3$; $\omega = 1,42$
 $\delta = (N^* \lambda^2 / A) + (M^* W) = (35,26 \cdot 10^3 \times 1,5 \times 1,42 / 56,3) + (0,1 \cdot 10 \times 1,5 / 51,2) = 1626,9 \text{ kg/cm}^2 < 2600$
Diagonal més sol·licitada: $N^*/A = 14,23 \cdot 10^3 \times 1,5 / 6,91 \times 2 = 1544,5 < 2600 \text{ kg/cm}^2$

ENCAVALLADA TIPUS 1
VENT = 0,075 T/mf = 4,5 m x 0,8 = 0,277 m
f/vent = 1285/0,96 = L/1280
f/hor = 900/1,01 = L/891

$\lambda = L_0/i_x = 250/0,35 = 714,3$; $\omega = 1,42$
 $\delta = (N^* \lambda^2 / A) + (M^* W) = (22,72 \cdot 10^3 \times 1,5 \times 1,42 / 56,3) + (0,002 \cdot 10 \times 1,5 / 51,2) = 865,3 \text{ kg/cm}^2 < 2600$
