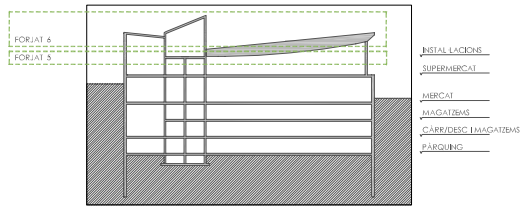
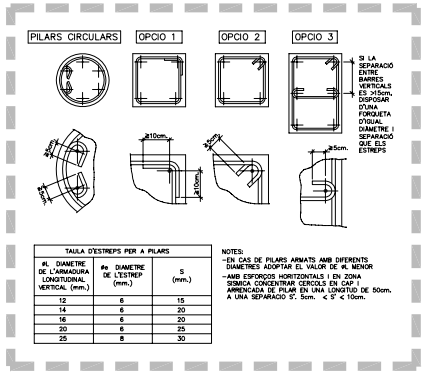
ESQUEMA PLANTES



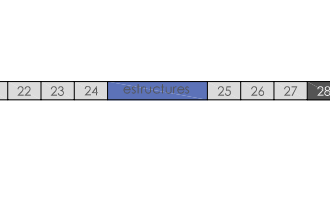
TAULA D'ESTREPS PER A PILARS I DETALLS DE TANCAMENT



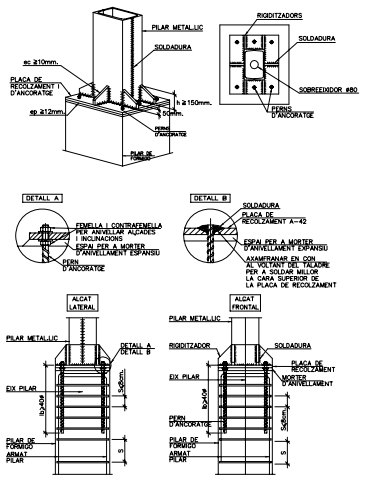
LA COBERTA DE FUSTA

La coberta del mercat es tracta d'una coberta lleugera amb panells sandvitx Thermochip suportats damunt d'unes biguetes de fusta laminada i encolada que estan subjectades a una gran biga de fusta de secció variable també laminada i encolada.

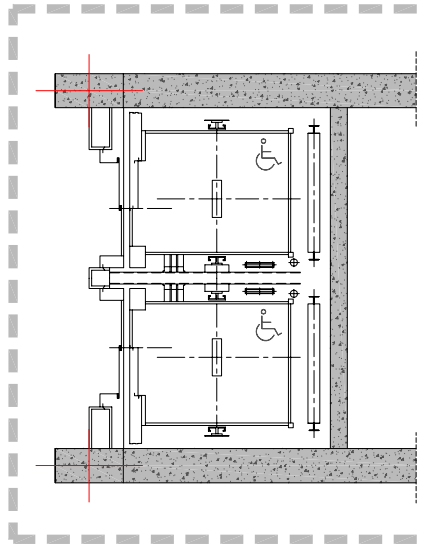
-Fusta laminada GL2
- mòdul d'elasticitat ——————— 116000 T / m²
- coeficient de dilatació ——————— 0.00003 /ºC
- Densitat ——————— 0.38 T / m³

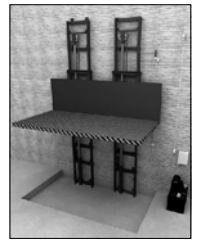


ARRENCADA DE PILAR (2 UPN TANCATS)



DETALL ASCENSORS





PLATAFORMA DE 2 COLUMNES
Senzill muntacàrregues per elevar les càrregues als magatzems del nivell intermig, de fàcil instal·lació i baix cost de manteniment.
Es tracta d'una elevació hidràulica mitjançant dos o quatre pistons que llisquen en dues columnes - guies, col·locades sobre el mateix costat de la plataforma . El lliscament dels carros sobre les columnes - guies és realitzat mitjançant corrons d'acer cònics, ajustables a les columnes - guies.
