Institutional Contacts

In connection with the publication of the Bulletin, the Structural Topology Research Group has begun to establish a system of contacts within departments and research groups.

Our first mailing of posters announcing the publication of the Bulletin was to institutions: schools of architecture and of engineering and departments of mathematics. Enclosed was a letter addressed to the dean, chairman or director (as appropriate) of the institution, asking them to designate one person in their group, a person likely to be interested in research in structural topology, who will act as a contact person between our research group and their institution. (A more inclusive mailing, with the same request, is now in preparation.

The development of a network of contact persons is in line with our general aim of enlarging the base for research in structural topology by collaboration with researchers and practitioners in other parts of the world. The specific purpose of forming this list of contact persons is to make it easy for researchers in a given geographic area, and interested in a given subject, to get in touch with one another, and with us.

This contact is of course a two-way street. We welcome correspondence from institutions concerning, for instance, related programs of research or the need for specialized instructional materials. On our part, we will from time to time distribute through

the contact people certain general information about the project and Bulletin, information concerning the availability of kits and instructional materials, and certain additional research materials which may be of interest to their colleagues, but which for one reason or another are not printed in the Bulletin.

We express our gratitude to those individuals, at institutions listed below, who have agreed to act as contact persons. We wish also to thank the directors and chairmen of their institutions and departments. for their prompt response to our request that a contact person be designated.

We ask those readers who work at institutions for which we do not already have a contact, to ask their director, dean or department chairman to designate someone, giving the information requested on the enclosed reply card.
