Con Vergerent Diversity

Reinforcing and creating axes convergences defining the site

Creating viewpoints and promenades, visual expansion zone

Allowing polifunctional and flexible uses of public square

Improved circulation | Traffic flow intensity

Different lifts connect several platforms from top Martinshang level down to Reitschule and from Aare level to Lorrainbrücke. The first ones connect to different uses, depending on the stop level and they provide a direct accessible connection between Schützenmatt and Alpenegg

Positioning Masterplan alignment perpendicular to Martinshang. Straightening Hodlerstrasse and therefore reinforcing cultural axis between Progr, Kunstmuseum and Reitschule

Reinforcing Langmur axis by un-hiding it and introducing it as a key connection to Aare and the new building

Creating a real balcony over the site allows an impressive view over Schützenmatt and also to generate an accessible icon.

Statepark uses the central space under the bridge, as this users will be predominant and they’re linked to the existing Reitschule activity

The Wettagngente is housed in a tunnel. To manage circulation at this point there’s a small roundabout that allows pick-up point for the Hotel and access to the parking located under the Masterplan buildings

Service street for delivery and access to Market & Reitschule and building nº12. Former Schützenmattstrasse traffic is now managed through the big roundabout

Big roundabout where Neubrückstrasse and Bollwerk converge

Hodlerstrasse is straightened and ends at Bollwerk

Creating an accessible icon over the site

Weekly market expands now in front of the Reithalle and under the bridge, allowing to grow over the Schutzenmatt square

The Wettagngente is housed in a tunnel. To manage circulation at this point there’s a small roundabout that allows pick-up point for the Hotel and access to the parking located under the Masterplan buildings

The Aarelift offers a unique side view of the Langmur. Integrated in the landscape when it emerges to reach the top level, indicating the connection route and serving as an accessible icon as well.

Tourist bus pick-up point is maintained and moved near the roundabout, separating pedestrian and traffic circulation flows.

There’s also a information point and public toilets under the...
