Having an ISO 9001 compliant QMS is not a significant competitive advantage. Question 12

We are in the process of ISO 9001 implementation.

Do the clients (investors) require an established QMS in order to get the contract?

There is no need to implement this standard in our sector.

Will your company try to establish an ISO 9001-compliant quality management system in the near future?

Costs of the certification are too high.

Reasons why not decided to implement the ISO 9001.

Percentage of clients that require an QMS in order to get the contract?

Percentage of companies that will try to establish ISO 9001 in the near future.

Reasons why not decided to implement the ISO 9001.

Percentage of companies that will try to establish ISO 9001 in the near future.

Reasons why not decided to implement the ISO 9001.

Percentage of clients that require an QMS in order to get the contract?
Are you following the changes of the environment related legislation?

Do you have a list of potential problems related to environmental management?

Has your company established any kind of environmental management system, or other program that could ensure the conformance to the environmental policy?

Does your company hold an environmental management policy? Have you determined the environmental goals and procedures?

How much of the previously existing EMS could you keep at the establishment of the ISO 14001-compliant EMS?

Are the existing QMS and EMS integrated?

Is there a protocol how the project documentation in the execution phase should be prepared?

Has your company established any kind of environmental management system, or other program that could ensure the conformance to the environmental policy?
If your organization has not yet established an EMS, or if it is not ISO 14001-compliant, please list the elements of environmental management that already exist:

Do you see (perceive) any barriers in the ISO 14001-compliant EMS implementation? Please rank the barriers listed below according to the perceived importance:

- Inadequacy of standards (different interpretation in construction industry)
- Separate design and execution in construction process
- Lack of environmentally friendly technologies and materials
- Lack of pressure for the governmental/legislative side
- Lack of support / demands from the customer side
- Poor environmental culture among competition
- Large costs of the EMS establishment
- Complicated documentation process
- Lack of support from workers' side

Answer most repeated

- Everything required by law

NO COMMENT

Will your company try to establish ISO 14001?

- Yes
- No
- Don't know

Percentage of companies that try to establish ISO 14001:

- European companies
- American companies
- Japanese companies
