ACKNOWLEDGEMENTS

Most of all I need to thank my two supervisors. Firstly I would like to thank Àlvar Garola Crespo for the opportunity to have more than a good time doing this research project and Bob Lark for all his kindness and construction wise, offered every Tuesday morning. Next, I would like to thank the members of the Construction Excellence in Wales, Carl Turner and Milica Kitson, for all their help, and especially for the help given with the questionnaire.

Special thanks also go to Chris Snow, Don Snow and Colin King for explaining their demonstration projects to me and for all their knowledge about the UK’s construction sector. Other thanks go to Joan Reus Frontera for his help with the questionnaire and the opportunity he gave me to speak with the Director Insular de Carreteres del Consell Insular de Mallorca, and also to Mikel Igoa Uriguen and Pere Riba Porras for their L.O.E knowledge. Last, but not least, I would like to thank Louise Anthony and Aina Roca Bauzà for reading carefully through my research and correcting my English mistakes so patiently.

Thank you to all of you,

Pau Estrany Planas
