LIST OF FIGURES

FIGURE 2-1 How Audits Fit into the Design Process (Austroads, 2002) ........................................7
FIGURE 2-2 Distribution of Speeding-Related Fatalities by Road Class, 1999 (US DOT, 2000). .................................................................11
FIGURE 2-3 Rate of Speeding-Related Fatalities by Road Class (fatalities per 100 million vehicle miles traveled, VMT), 1999 (US DOT, 2000) .................................................................11
FIGURE 2-4 Crash Involvement Rate by Variation from Average Travel Speed, Day and Night (TRB, 1998). .................................................................12
FIGURE 2-5 Relationship between Speed and Crash Involvement (Stuster et al., 1998). 13
FIGURE 2-6 Traveling Speed and the Risk of Involvement in a Casualty Crash Relative to Traveling at 60 km/h in a 60 km/h Speed Limit Zones (Kloeden et al., 1997).........15
FIGURE 2-7 Average Speed on Rural Interstates in Georgia, 1996–1997 (Dougherty, 2000). .................................................................................................22
FIGURE 2-10 Rural Interstate Highway Fatalities in Georgia, 1993–1997 (Dougherty, 2000). .................................................................................................23
FIGURE 2-11 Maximum and Average Changes in the 85th Percentile Speeds at the Experimental Sites (Parker, 1997). .................................24
FIGURE 3-1 Basic Crash Patterns. ........................................................................................................29
FIGURE 3-2 Urban Highway Cross-Section Design Features and Terms (FHWA, 1997). .................................................................................................34
FIGURE 3-3 Approach and Departure Sight Triangles (AASHTO, 2001). ......................35
FIGURE 3-4 Example Stopwatch Speed Study Layout (CTRE, 2002). ........................................41
FIGURE 3-5 Radar Meter (CTRE, 2002). ..........................................................................................42
FIGURE 3-6 Example Radar Meter Speed Study Layout (CTRE, 2002). ......................43
FIGURE 3-7 JAMAR Automatic Counter-Classifier Recorder (Jamar Technologies Inc.). ........................................................................................................43
FIGURE 3-8 Example Pneumatic Road Tubes Speed Study Layout (Jamar Technologies Inc.). ........................................................................................................44
FIGURE 4-1 Massachusetts Regions and Towns in the Central Region............................49
FIGURE 4-2 Selected Roadways in the Town of Natick..............................................................51
FIGURE 4-3 Crash Count by year on South Main Street. ......................................................54
FIGURE 4-4 Crash Data by Location on South Main Street. .................................................55
FIGURE 4-5 Crash Data by Crash Pattern on South Main Street ........................................56
FIGURE 4-6 Crash Count by year on Glen Street ..........................................................57
FIGURE 4-7 Crash Data by Location on Glen Street .....................................................58
FIGURE 4-8 Crash Data by Crash Pattern on Glen Street ...........................................59
FIGURE 4-9 Crash Count by year on Walnut Street .....................................................60
FIGURE 4-10 Crash Data by Location on Walnut Street .............................................61
FIGURE 4-11 Crash Data by Crash Pattern on Walnut Street .....................................62
FIGURE 4-12 Crash Count by year on Pine Street ......................................................63
FIGURE 4-13 Crash Data by Location on Pine Street ..................................................64
FIGURE 4-14 Crash Data by Crash Pattern on Pine Street .........................................65
FIGURE 4-15 Crash Count by year on Hartford Street ...............................................66
FIGURE 4-16 Crash Data by Location on Hartford Street ..........................................67
FIGURE 4-17 Crash Data by Crash Pattern on Hartford Street ...................................68
FIGURE 4-18 Crash Count by year on Union Street ...................................................69
FIGURE 4-19 Crash Data by Location on Union Street .............................................70
FIGURE 4-20 Crash Data by Crash Pattern on Union Street ......................................71
FIGURE 4-21 South Main Street Typical Cross Section ..............................................72
FIGURE 4-22 South Main Street Signage ...................................................................73
FIGURE 4-23 South Main Street in Winter .................................................................74
FIGURE 4-24 Glen Street Typical Cross Section ..........................................................75
FIGURE 4-25 Glen Street Signage ..............................................................................76
FIGURE 4-26 Intersection of Walnut Street with Bacon Street ...............................77
FIGURE 4-27 Walnut Street Typical Cross Section .....................................................78
FIGURE 4-28 Walnut Street Signage .........................................................................78
FIGURE 4-29 Walnut Street in Winter ........................................................................79
FIGURE 4-30 Pine Street Typical Cross Section ..........................................................80
FIGURE 4-31 Pine Street Signage ..............................................................................81
FIGURE 4-32 Pine Street in Winter ............................................................................81
FIGURE 4-33 Hartford Street Typical Cross Section ....................................................82
FIGURE 4-34 Hartford Street Signage ........................................................................83
FIGURE 4-35 Hartford Street in Winter .....................................................................84
FIGURE 4-36 Union Street Typical Cross Section .......................................................85
FIGURE 4-37 Union Street Signage ...........................................................................86
FIGURE 4-38 Road Tube Layout ................................................................................87
FIGURE 4-39 Counter Locations on the Six Roadways ............................................88
FIGURE 4-40 Cumulative Frequency Distribution Curves ......................................92
