**Notes:**
- Concrete should be laid at a thickness of 50mm.
- Steel should be fixed with adhesive for stability.
- Glass panels must be reinforced with steel frames.

**Architectural Details:**
- Roof structure requires additional support beams for stability.
- Staircase should have non-slip material on treads.
- Interior walls should be finished with textured plaster for sound absorption.

**Design Specifications:**
- Color scheme should feature muted tones with occasional accents.
- Lighting should be designed to highlight art pieces without causing glare.
- Accessibility features must be included for all guests.
