

INDEX

Abstract	I
CHAPTER 1. INTRODUCTION	1
1.1 <i>The problem and its precedents</i>	1
1.2 <i>Aims of this work</i>	3
1.3 <i>Overview and contents of the report</i>	3
CHAPTER 2. GEOLOGICAL CONTEXT OF THE PROBLEM	4
2.1 <i>Geographical situation of the area</i>	4
2.2 <i>Extension and Geology of the “Potash Basin” (CK)</i>	6
2.3 <i>Short history of salt mining and associated problems</i>	8
CHAPTER 3. MONITORING OF SURFACE DISPLACEMENTS INDUCED BY MINING	11
3.1 <i>Short review of real cases and techniques</i>	11
3.2 <i>Monitoring of surface displacement with the GPS</i>	12
3.2.1 <i>Summary description of the GPS system</i>	14
CHAPTER 4. NETWORK FOR MONITORING THE SUBSIDENCE AT THE ‘CK’ AREA	19
4.1 <i>General description of the network</i>	19
4.2 <i>Data acquisition procedure at each epoch</i>	23
4.3 <i>Post-processing strategies of the raw data</i>	25
4.3.1 <i>General overview of the SW to process the GPS data</i>	26
4.3.2 <i>Trimble Geomatics Office (TGO) software</i>	30
4.3.3 <i>Bernese software</i>	33
CHAPTER 5. DECEMBER 2007 CAMPAIGN AT THE ‘CK’ NETWORK	38
5.1 <i>Description of the data acquired</i>	38

5.2	<i>The different strategies with BERNESE</i>	40
5.2.1	<i>Definition of the project</i>	43
5.2.2	<i>Import file</i>	45
5.2.3	<i>Data Preprocessing</i>	48
5.2.4	<i>Data Processing</i>	55
5.3	<i>Post processing with the TGO</i>	61
5.3.1	<i>Definition of the project</i>	62
5.3.2	<i>Import file</i>	63
5.3.3	<i>Data Processing</i>	67
5.4	<i>The final solution</i>	71
CHAPTER 6. CONCLUSION		81
