“Retrieving pattern in a context of sustainable tourism”

6th Conference of International Forum on Urbanism
The new holiday tourism. Tourism and economic development, Responsible Tourism

Authors: Nasiha POZDER, Edin SREBRENICA
“Retrieving pattern in a context of sustainable tourism”

Codes of traditional and un-desecrated landscape:
  ▫ priceless values
  ▫ continuum and catholicity
  ▫ absolute value
  ▫ significant element of development

• Keywords: Pattern, sustainable tourism, typicality’s
“Retrieving pattern in a context of sustainable tourism”

Collapse or misbalance of Codes =
lost of pattern

Pattern =
recognizable time or spatial regularity or the connection between
specific elements

Sustainable tourism =
appropriate course and strategy to keep retrieved
pattern stable

“The essential feature which must be maintained is the identity of the system. This identity can be defined as that which distinguishes the system from its background or environment. This allows the emergence of systems whose state may change but whose identity is maintained.”

Batty (2001.)

Conclusion:

- Retrieving of pattern = spatial catalyst by different aspects, such as sustainable tourism

- Chosen and mapped sites = natural values and elements of cultural-historical heritage, what classifies them as important resources for sustainable tourism

- Mapped capacities of rural architecture and their location in a broader context inside specific regions, allows implementation of propagated principle of grid creation, as a basis for support and sustainable tourism development.
