Richard Neutra Case Study Project

In the mountains of southern California, near Malibu, there is a house called "Yoshi" which is the residence of a family. The house is situated on a south-facing slope, with views of the ocean and mountains. Looking out on the wide expanse of water, it is a stunning view of the ocean. The house is surrounded by gardens, trees, and bushes, giving it a natural and serene atmosphere.

The main floor contains the living room, kitchen, and dining area. The kitchen is well-equipped with modern appliances. The living room is comfortable and inviting, with ample seating and a large television. The dining area is spacious and can accommodate a large number of people.

The second floor contains the bedrooms and bathrooms. The master bedroom is spacious and includes a walk-in closet. The second bedroom is smaller and is used as a guest room. The bathrooms are well-equipped with modern fixtures.

The house is designed to be energy-efficient, with solar panels on the roof to provide electricity. The house is also designed to be environmentally friendly, with rainwater harvesting systems and efficient heating and cooling systems.

The site plan shows the location of the house in relation to the surrounding landscape. The program plan shows the layout of the interior spaces. The structure plan shows the layout of the building's framework. The entrance plan shows the layout of the main entrance and the circulation plan shows the layout of the interior circulation. The enclosure plan shows the layout of the exterior walls and windows.
