

DIPLOMA

Helsinki, 16 June 2016

Winner of the Nordic Built Cities Challenge of
Smart, green and urban – revitalising the
transport hub at Trygve Lies plass:

Flying Carpet

The winning solution is a simple, shapely and architecturally good project that also finds excellent solutions to logistical challenges related to the connection between pedestrians and public transport.

The jury finds Flying Carpet to be very innovative with its solutions when it comes to architectural and landscape architectural instruments regarding green mobility.
