

somesite.com

mybank.com

GET Origin: somesite.com

```
sequenceDiagram
    participant S as somesite.com
    participant M as mybank.com
    S->>M: GET Origin: somesite.com
    M-->>S: GET Access-Control-Allow-Origin: somesite.com
```

The diagram illustrates an XMLHttpRequest GET request. A horizontal arrow points from the left vertical line (somesite.com) to the right vertical line (mybank.com). The text "GET Origin: somesite.com" is centered above the arrow.

GET Access-Control-Allow-Origin: somesite.com

```
sequenceDiagram
    participant S as somesite.com
    participant M as mybank.com
    S->>M: GET Origin: somesite.com
    M-->>S: GET Access-Control-Allow-Origin: somesite.com
```

The diagram illustrates an XMLHttpRequest GET response. A horizontal arrow points from the right vertical line (mybank.com) back to the left vertical line (somesite.com). The text "GET Access-Control-Allow-Origin: somesite.com" is centered above the arrow.
