Erratum

The article entitled “Modeling the effects of biomass accumulation on the performance of a biotrickling filter packed with PUF support for the alkaline biotreatment of dimethyl disulfide vapors in air”.

In the mathematical model section, page 100, equation number 7, should be

\[
\frac{\partial C_u}{\partial t} - D_{\text{eff}} \frac{\partial^2 C_u}{\partial x^2} + R_u
\]

In published version of the article, the expression $\delta^2$ was accidentally included when it should not appear. In any case this error was not present in the simulation which was confirmed to be unit consistent.
