CONCEPTUAL DEVELOPMENT AND MARKET AND VIABILITY STUDY OF A MUSIC PRODUCTION SOFTWARE AND HARDWARE COMPANY

Document:
Budget

Author:
Gabriel Baró Larriba

Director - Codirector:
Xavier Resa Navarro
Pedro Monagas Asensio

Degree:
Industrial Technologies Engineering Degree

Announcement:
Spring, 2022

FINAL DEGREE STUDY

In this document we will see the budget of the study that we made. We are going to consider the different aspects that are needed in order to complete it and suppose a cost.

Hardware:

- We need a laptop that is able to run the software that we will be using, and since we are developing 3D models, we need a good processor. We have been using an ASUS UX310U, with a price of 799€

Software:

- Microsoft Office (Word and Excel): To write and calculate what has been done in the study we need the Microsoft office 365 software, with a price of 69€.
- SolidWorks: To develop the hardware components in a 3D model, we need the Dassault Assembly CAD software SolidWorks, with a price of 4.195€.

Salaries:

- To develop this study, we need an engineer. We spent around 350 hours developing it, and the salary is 30€/hour, which means a total cost of 10.500€.

If we gather all the costs stated above, we have:

Concept	Cost (€)
ASUS UX310U	799
Microsoft Office 365	69
SolidWorks	4.195
Engineer Salary	10.500
TOTAL	15.563
