

## Budget summary and/or economic feasibility study

This chapter describes the budget of this thesis taking into account the following requirements:

- Number of working hours: 4 months (from April till July), 84 working days in total, 672 working hours. 15,13 € per hour.

The total amount per working hour is 10.167,36 €

- Computer energy consumption:

The price of German electricity in recent months has varied considerably (it has fluctuated between 0.22 € and 0.38 €/kWh), therefore we assume an average cost of 0.30 €/kWh.

Approximately gross power consumption per 8 working hours = 2,2 kW/h → 184,8 kW. 184,8 kW → 55 €

Total: 10.222,36 €
